

HIGH PERFORMANCE REPLACEABLE HEAD DRILLS 3xD and 5xD

SPECIAL OFFER

Features & Benefit

- Consistently high performance, even after numerous head changes.
- Reduction in inventory costs – one body can fit multiple solid carbide head sizes.
- Versatile – cylindrical shank with flutes allows use in multiple types of holder.
- Easy and quick head changes with minimal interruption to the production process. Heads can be changed without removing the body from the machine.
- Exact fit of head to body maximises tool rigidity for superior hole accuracy and precise tolerances.
- All three geometries are interchangeable with the drill bodies to reduce the number of bodies needed. There are a number of sizes of head that fit to one drill body. To find suitable size heads for corresponding bodies click here to view Dormer's Hydra product brochure
